YOUR NAME

MECHANICAL ENGINEERING STUDENT / ROBOTICS & AUTONOMOUS SYSTEMS

PROFILE

Replace this starter copy with a two-to-three sentence summary. Focus on the mechanical engineering foundation you are building and the robotics or autonomous-systems problems you want to solve.

EDUCATION

B.Eng. Mechanical Engineering - [University Name]

[Expected graduation] / [City, Country] / CGPA: [optional]

SELECTED PROJECTS

Pathfinder Inspection Rover

Concept / In progress - CAD, embedded control, sensors, navigation.

KinetiGrip Smart Gripper

Concept / In progress - mechanisms, actuation, feedback, prototype testing.

NavSight Vision Stack

Concept / In progress - Python, OpenCV, perception testing.

RELEVANT SKILLS

Mechanical Design / CAD / Prototyping / Engineering Analysis / Python / Microcontrollers / Sensors / Robotics Fundamentals / Technical Documentation
